

**Remarks/Arguments**

The application currently contains claims 1-10. New claims 11-20 have been added. Claims 3, 4, 6 and 8 to 10 are currently amended.

**Amendments to the Claims**

Applicant has amended claims 3, 4, 6 and 8 to 10 in order to remove multiple dependencies. In particular:

Claim 3 has been amended to only depend from claim 1.

Claim 4 has been amended to only depend from claim 1.

Claim 6 has been amended to only depend from claim 2.

Claim 8 has been amended to only depend from claim 1.

Claim 9 has been amended to only depend from claim 8.

Claim 10 has been amended to only depend from claim 1.

New claims 11 to 20 are supported by the original disclosure. Specifically, new claim 11 is supported by original claim 3 depending from original claim 2.

New claim 12 is supported by original claim 6 depending from original claim 3.

New claim 13 is supported by original claim 6 depending from original claim 4.

New claim 14 is supported by original claim 4 depending from original claim 2.

New claim 15 is supported by original claim 5 depending from original claims 4 and 2.

New claim 16 is supported by original claim 8 depending from original claim 3.

New claim 17 is supported by original claim 8 depending from original claim 1.  
In order to ensure clarity of claim 17 the receiver circuit is introduced in new claim 17  
thereby supporting good antecedence.

New claim 18 is supported by original claim 10 depending from original claim 2.

New claim 19 is supported by original claim 10 depending from original claim 3.

New claim 20 is supported by original claim 10 depending from original claim 8.

No new matter has been added in the amendment.
